CABLE TV
INTERNET

As a Cedars Senior Living Community resident, I want you to be aware of other optional services offered at the Cedars, specifically that we are able to offer simple hassle-free access to **cable television and high-speed internet.**

Access to cable television is available exclusively to the residents at the Cedars and is not available to the general public. Cedars Senior Living uses bulk purchasing abilities to create great savings for our residents. It is the same standard package and programming provided by other cable service providers in the area. The price is where we differ. Cedar's residents are able to receive cable television at a **discount of about 30%.**

High-speed internet is also offered exclusively to residents at the Cedars. Modem and in-house Wi-Fi are included at no additional charge. Again, Cedar's residents are able to take advantage of this high-speed internet at a **discounted rate of about 35%** compared to local competitors.

Below please find the current rate sheet for you to compare pricing with that of the other cable television and internet providers. I believe Cedars will meet your needs and add to your monthly savings.

Sincerely,

Keleigh Tyler
Community Manager
